CD/E-MAIL FORMAT

Each Mail constitutes two tab delimited text files. The tab delimited format can be opened in Microsoft Excel as long as the record count does not exceed 65,000. The tab delimited format is easily opened in Microsoft Access.

The main file is the voter record for the selection criteria requested, and the vote history file contains the voting activity by election date of the voters in the main file. The number of vote history records per voter will not exceed twenty, but may be less based upon the registrant's participation. New voters and voters who have not participated in a prior election will have no Vote History records.

Within the Voter History table, the first two fields uniquely identify the voter and will be the join fields for the Main File. 1 The last two have the "historical rank" of the election date (0 for most recent for that voter, 1 for second most recent, etc.) and the election date.

1 Jurisdiction_Parish and Registration_Number create a unique identifier for joining the main record to the vote history record.
